Volume 10696

Proceedings of SPIE 0277-786X, V. 10696

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Tenth International Conference on Machine Vision, edited by Antanas Verikas, Petia Radeva, Dmitry Nikolaev, Jianhong Zhou, Proc. of SPIE Vol. 10696, 1069601 · © 2018 SPIE
CCC code: 0277-786X/18/$18 · doi: 10.1117/12.2319685

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Authors*

xiii *Conference Committee*

xvii *Introduction*

PATTERN RECOGNITION

10696 02 **Analysis of straw row in the image to control the trajectory of the agricultural combine harvester** [10696-90]

10696 03 **Geometry-based populated chessboard recognition** [10696-71]

10696 04 **Biometric identification based on feature fusion with PCA and SVM** [10696-30]

10696 05 **Comparison of the scanned pages of the contractual documents** [10696-12]

10696 06 **Textual blocks rectification method based on fast Hough transform analysis in identity documents recognition** [10696-95]

10696 08 **Deep learning based beat event detection in action movie franchises** [10696-40]

TARGET DETECTION AND TRACKING

10696 09 **Compressed multi-block local binary pattern for object tracking** [10696-81]

10696 0A **Enhanced online convolutional neural networks for object tracking** [10696-84]

10696 0B **Automated grain extraction and classification by combining improved region growing segmentation and shape descriptors in electromagnetic mill classification system** [10696-45]

10696 0C **Distribution majorization of corner points by reinforcement learning for moving object detection** [10696-27]

10696 0D **Performance improvement of multi-class detection using greedy algorithm for Viola-Jones cascade selection** [10696-78]

10696 0E **Vision based speed breaker detection for autonomous vehicle** [10696-107]

10696 0F **Deep learning architecture for recognition of abnormal activities** [10696-113]

10696 0G **Multi person detection and tracking based on hierarchical level-set method** [10696-91]

10696 0H **Vanishing points detection using combination of fast Hough transform and deep learning** [10696-99]

10696 0I **Aggregated channels network for real-time pedestrian detection** [10696-54]

10696 0J **Algorithm for covert convoy of a moving target using a group of autonomous robots** [10696-33]

10696 0K **Compressed normalized block difference for object tracking** [10696-82]

FEATURE MATCHING AND IMAGE SEGMENTATION

10696 0L **Neural network-based feature point descriptors for registration of optical and SAR images** [10696-72]

10696 0M **FPFH-based graph matching for 3D point cloud registration** [10696-14]

10696 0N **Graphic matching based on shape contexts and reweighted random walks** [10696-59]

10696 0O **A comparative analysis of image features between weave embroidered Thangka and piles embroidered Thangka** [10696-65]

10696 0P **From image captioning to video summary using deep recurrent networks and unsupervised segmentation** [10696-67]

10696 0Q **A novel automatic segmentation workflow of axial breast DCE-MRI** [10696-43]

10696 0R **Breast mass segmentation in mammograms combining fuzzy c-means and active contours** [10696-102]

10696 0S **An adhered-particle analysis system based on concave points** [10696-10]

10696 0T **Segmentation algorithm on smartphone dual camera: application to plant organs in the wild** [10696-112]

10696 0U **Video segmentation using keywords** [10696-79]

10696 0V **Fast words boundaries localization in text fields for low quality document images** [10696-108]

IMAGE CLASSIFICATION

10696 0W **Early detection of lung cancer from CT images: nodule segmentation and classification using deep learning** [10696-29]

10696 0X **Singular spectrum decomposition of Bouligand-Minkowski fractal descriptors: an application to the classification of texture Images** [10696-34]

10696 0Y **Classification of time-series images using deep convolutional neural networks** [10696-23]

10696 0Z **Gender classification from face images by using local binary pattern and gray-level co-occurrence matrix** [10696-47]

10696 10 **Training a whole-book LSTM-based recognizer with an optimal training set** [10696-38]

10696 11 **A deep learning pipeline for Indian dance style classification** [10696-7]

10696 12 **Automatic white blood cell classification using pre-trained deep learning models: ResNet and Inception** [10696-105]

10696 13 **Convolutional neural network with transfer learning for rice type classification** [10696-21]

10696 14 **Comparison of classification algorithms for various methods of preprocessing radar images of the MSTAR base** [10696-17]

IMAGE ANALYSIS AND QUALITY ASSESSMENT

10696 15 **Mobile and embedded fast high resolution image stitching for long length rectangular monochromatic objects with periodic structure** [10696-73]

10696 16 **Modification of YAPE keypoint detection algorithm for wide local contrast range images** [10696-104]

10696 17 **Reducing noise component on medical images** [10696-31]

10696 18 **Image quality assessment for selfies with and without super resolution** [10696-66]

10696 19 **Toward a perceptual image quality assessment of color quantized images** [10696-13]

10696 1A **Spatio-thermal depth correction of RGB-D sensors based on Gaussian processes in real-time** [10696-41]

10696 1B **Analysis of computer images in the presence of metals** [10696-69]

10696 1C **Optimization of the hierarchical interpolator for image compression** [10696-28]

10696 1D **Sum of top-hat transform based algorithm for vessel enhancement in MRA images** [10696-55]

10696 1E **A detail-preserved and luminance-consistent multi-exposure image fusion algorithm** [10696-19]

10696 1F **3D shape recovery from image focus using Gabor features** [10696-5]

10696 1G **The method for homography estimation between two planes based on lines and points** [10696-80]

10696 1H **Document localization algorithms based on feature points and straight lines** [10696-110]

10696 1I **Perception-oriented fusion of multi-sensor imagery: visible, IR, and SAR** [10696-46]

MACHINE VISION AND VISUALIZATION

10696 1J **Wire connector classification with machine vision and a novel hybrid SVM** [10696-35]

10696 1K **High-resolution hyperspectral ground mapping for robotic vision** [10696-64]

10696 1L **A study on low-cost, high-accuracy, and real-time stereo vision algorithms for UAV power line inspection** [10696-2]

10696 1M **Drawing a baseline in aesthetic quality assessment** [10696-106]

10696 1N **Fuzzy classification for strawberry diseases-infection using machine vision and soft-computing techniques** [10696-50]

10696 1O **A low-cost machine vision system for the recognition and sorting of small parts** [10696-60]

10696 1P **Three main paradigms of simultaneous localization and mapping (SLAM) problem** [10696-74]

10696 1Q **Computer vision system: a tool for evaluating the quality of wheat in a grain tank** [10696-77]

10696 1R **Using virtual environment for autonomous vehicle algorithm validation** [10696-100]

10696 1S **Reinforcement learning in computer vision** [10696-58]

10696 1T **Aerial images visual localization on a vector map using color-texture segmentation** [10696-88]

VIDEO PROCESSING TECHNOLOGY AND METHODS

10696 1U **Image quality assessment for video stream recognition systems** [10696-39]

10696 1V **Recurrent neural network based virtual detection line** [10696-48]

10696 1W **First stereo video dataset with ground truth for remote car pose estimation using satellite markers** [10696-36]

10696 1X **Method of determining the necessary number of observations for video stream documents recognition** [10696-86]

10696 1Y **A no-reference image and video visual quality metric based on machine learning** [10696-25]

10696 1Z **Optimal frame-by-frame result combination strategy for OCR in video stream** [10696-89]

10696 20 **Satellite markers: a simple method for ground truth car pose on stereo video** [10696-37]

10696 21 **Hierarchical vs non-hierarchical audio indexation and classification for video genres** [10696-51]

COMPUTER PHOTOGRAPHY AND IMAGING TECHNOLOGY

10696 22 **Overview of machine vision methods in x-ray imaging and microtomography** [10696-44]

10696 23 **Triadic split-merge sampler** [10696-16]

10696 24 **Pixel-wise deblurring imaging system based on active vision for structural health monitoring at a speed of 100 km/h** [10696-26]

10696 25 **Laser projection positioning of spatial contour curves via a galvanometric scanner** [10696-22]

10696 26 **Blur kernel estimation with algebraic tomography technique and intensity profiles of object boundaries** [10696-63]

10696 27 **Formation of the image on the receiver of thermal radiation** [10696-93]

10696 28 **3D shape recovery from image focus using gray level co-occurrence matrix** [10696-8]

10696 29 **Establishing the correspondence between closed contours of objects in images with projective distortions** [10696-101]

10696 2A **Real-time stop sign detection and distance estimation using a single camera** [10696-49]

IMAGE PROCESSING AND APPLICATIONS

10696 2B **Face landmark point tracking using LK pyramid optical flow** [10696-109]

10696 2C **Researches of fruit quality prediction model based on near infrared spectrum** [10696-20]

10696 2D **Non-parametric adaptative JPEG fragments carving** [10696-70]

10696 2E **2.5d body estimation via refined forest with field-based objective** [10696-62]

10696 2F **Rough case-based reasoning system for continues casting** [10696-4]

10696 2G **Generation method of synthetic training data for mobile OCR system** [10696-83]

10696 2H **The evaluation of correction algorithms of intensity nonuniformity in breast MRI images: a phantom study** [10696-15]

10696 2I **Ontology based decision system for breast cancer diagnosis** [10696-42]

10696 2J **Age and gender estimation using Region-SIFT and multi-layered SVM** [10696-6]

10696 2K **Multiview 3D sensing and analysis for high quality point cloud reconstruction** [10696-61]

10696 2L **Hand motion modeling for psychology analysis in job interview using optical flow-history motion image: OF-HMI** [10696-115]

COMPUTER INFORMATION ENGINEERING AND SIGNAL PROCESSING

10696 2M **Speaker emotion recognition: from classical classifiers to deep neural networks** [10696-18]

10696 2N **Method of estimation of scanning system quality** [10696-57]

10696 2O **Squeeze-SegNet: a new fast deep convolutional neural network for semantic segmentation** [10696-24]

10696 2P **Faulty node detection in wireless sensor networks using a recurrent neural network** [10696-114]

10696 2Q **Laban movement analysis to classify emotions from motion** [10696-9]

10696 2R **A new centrality measure for identifying influential nodes in social networks** [10696-56]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

International Advisory Committee

Petra Perner, Institute of Computer Vision and Applied Computer Sciences (Germany)
Alexander Bernstein, Skolkovo Institute of Science and Technology (Russian Federation)

Conference Chairs

Antanas Verikas, Halmstad Universitet (Sweden)
Petia Radeva, Universidad of Barcelona (Spain)
Dmitry Nikolaev, Institute for Information Transmission Problems, RAS (Russian Federation)

Program Chairs

Aristidis Likas, University of Ioannina (Greece)
Evgeni Magid, Kazan Federal University (Russian Federation)
Pino Caballero-Gil, Universidad de La Laguna (Spain)

Publication Chair

Jianhong Zhou, Xihua University (China)

Technical Committee

Hao Ji, California State Polytechnic University (United States)
Gernot Stübl, Visual Computing Team (Austria)
Zhenyu Liu, Shenyang University Technology (China)
Manjunath V. Joshi, Dhirubhai Ambani Institute of Information and Communication Technology (India)
Victoria A. Sablina Ryazan State Radioengineering University (Russian Federation)
Alexander Privalov,Tula State Pedagogical University (Russian Federation)

Introduction

Dear Distinguished Delegates and Guests,

The Organizing Committee warmly welcomes you to the Tenth International Conference on Machine Vision (ICMV 2017), held during November 13-15, 2017, in Vienna, Austria.

The ICMV 2017 aims to present the latest research and results of scientists (Professors, students, PhD Students, engineers, and post-doctoral scientists) related to Machine Vision. The conference provides opportunities for the delegates of different areas to exchange new ideas and application experiences face to face, to establish business or research relations, and to find global partners for future collaboration.

The keynote speeches from leading experts in the field from all around the globe will present the state-of-the-art in all major fields of Machine Vision. The highly selective peer-review process will guarantee the quality of accepted papers that will be published by SPIE.

After the peer-review process, the submitted papers were selected on the basis of originality, significance, and clarity for the purpose of the conference. The selected papers and additional late-breaking contributions presented as lectures will make an exciting technical program.

The proceeding records the papers presented at the conference. The main conference theme and track is Machine Vision. We hope all participants and other interested readers benefit scientifically from the proceedings and find it stimulating in the process.

On behalf of the conference committees, we are glad to have the pleasure to cordially invite you to this outstanding event, to share your latest research findings and/or R&D works with the research community by submitting papers to this conference.

Looking forward to seeing you in Vienna, for ICMV 2017.

With our warmest regards,

Antanas Verikas
Petia Radeva
Dmitry Nikolaev
