Volume 10664

Proceedings of SPIE 0277-786X, V. 10664

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping III, edited by
J. Alex Thomasson, Mac McKee, Robert J. Moorhead, Proc. of SPIE Vol. 10664, 1066401
© 2018 SPIE · CCC code: 0277-786X/18/$18 · doi: 10.1117/12.2502380

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
xi *Conference Committee*

SESSION 1 COLLECTING RELIABLE IMAGE DATA WITH UAVS

10664 02 **Implications of sensor inconsistencies and remote sensing error in the use of small unmanned aerial systems for generation of information products for agricultural management (Invited Paper)** [10664-1]

10664 03 **Ground-truthing of UAV-based remote sensing data of citrus plants** [10664-2]

10664 04 **Quality assessment of radiometric calibration of UAV image mosaics** [10664-3]

10664 05 **Correction of in-flight luminosity variations in multispectral UAS images, using a luminosity sensor and camera pair for improved biomass estimation in precision agriculture** [10664-4]

10664 06 **An initial exploration of vicarious and in-scene calibration techniques for small unmanned aircraft systems** [10664-5]

10664 07 **Behavior of vegetation/soil indices in shaded and sunlit pixels and evaluation of different shadow compensation methods using UAV high-resolution imagery over vineyards** [10664-6]

SESSION 2 PROXIMAL AND REMOTE SENSING FOR PHENOTYPING

10664 09 **Detection of canola flowering using proximal and aerial remote sensing techniques (Invited Paper)** [10664-8]

10664 0A **Vinobot and vinoculer: from real to simulated platforms** [10664-34]

10664 0B **Phenotyping of sorghum panicles using unmanned aerial system (UAS) data** [10664-9]

10664 0D **Calibrated plant height estimates with structure from motion from fixed-wing UAV images** [10664-11]

SESSION 3 THERMAL AND HYPERSPECTRAL IMAGING FROM UAVS

10664 0E **Inter-comparison of thermal measurements using ground-based sensors, UAV thermal cameras, and eddy covariance radiometers** [10664-12]

10664 0F **A detailed study on accuracy of uncooled thermal cameras by exploring the data collection workflow** [10664-13]

10664 0H **A low-cost method for collecting hyperspectral measurements from a small unmanned aircraft system** [10664-15]

10664 0I **Hyperspectral detection of methane stressed vegetation (Best Paper Award)** [10664-16]

SESSION 4 DETECTING YIELD, DISEASE, AND WATER STRESS FROM UAVS

10664 0K **Multispectral remote sensing for yield estimation using high-resolution imagery from an unmanned aerial vehicle** [10664-18]

10664 0L **Disease detection and mitigation in a cotton crop with UAV remote sensing** [10664-19]

10664 0M **An unmanned aerial system for the detection of crops with undergraduate project-based learning (Invited Paper)** [10664-35]

10664 0N **Experimental approach to detect water stress in ornamental plants using sUAS-imagery** [10664-20]

SESSION 5 ANALYTICS FOR UAV-BASED CROP MANAGEMENT

10664 0O **Machine learning techniques for the assessment of citrus plant health using UAV-based digital images** [10664-21]

10664 0Q **Evaluation of multispectral unmanned aerial systems for irrigation management** [10664-23]

SESSION 6 INNOVATIVE UAV APPLICATIONS

10664 0R **UAV videos to extend research to producers** [10664-25]

10664 0S **A comparison of manned and unmanned aerial Lidar systems in the context of sustainable forest management** [10664-26]

10664 0T **Spatial analysis of multispectral and thermal imagery from multiple platforms** [10664-27]

10664 0U **Evaluating the capabilities of Sentinel-2 and Tetracam RGB+3 for multi-temporal detection of thrips on capsicum** [10664-28]

POSTER SESSION

10664 0W **Using hyperspectral sensors for crop vegetation status monitoring in precision agriculture** [10664-32]

10664 0X **MoniSCAN: software for multispectral monitoring of the crops vegetation status** [10664-33]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Robert Fiete, Harris Corporation (United States)

Symposium Co-chair

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)

Conference Chairs

J. Alex Thomasson, Texas A&M University (United States)
Mac McKee, Utah State University (United States)
Robert J. Moorhead, Mississippi State University (United States)

Conference Program Committee

Atanu Basu, Ayata (United States)
Christoph Bauer, KWS SAAT AG (Germany)
Subodh Bhandari, California State Polytechnic Univ., Pomona (United States)
Andrew N. French, Agricultural Research Service (United States)
Yufeng Ge, University of Nebraska-Lincoln (United States)
Cheryl McCarthy, University of Southern Queensland (Australia)
Seth C. Murray, Texas A&M University (United States)
Haly Neely, Texas A&M University (United States)
Boyan Peshlov, Climate Corporation (United States)
Carl Salvaggio, Rochester Institute of Technology (United States)
Michael Sama, University of Kentucky (United States)
Sindhuja Sankaran, Washington State University (United States)
Ajay Sharda, Kansas State University (United States)
Yeyin Shi, University of Nebraska-Lincoln (United States)

Session Chairs

1 Collecting Reliable Image Data with UAVs
J. Alex Thomasson, Texas A&M University (United States)

2 Proximal and Remote Sensing for Phenotyping
Robert J. Moorhead, Mississippi State University (United States)

3 Thermal and Hyperspectral Imaging from UAVs
Mac McKee, Utah State University (United States)

4 Detecting Yield, Disease, and Water Stress from UAVs
Robert J. Moorhead, Mississippi State University (United States)

5 Analytics for UAV-based Crop Management
Mac McKee, Utah State University (United States)

6 Innovative UAV Applications
J. Alex Thomasson, Texas A&M University (United States)
