

PROCEEDINGS OF SPIE

Laser Communication and Propagation through the Atmosphere and Oceans IX

**Jaime A. Anguita
Jeremy P. Bos
David T. Wayne**
Editors

**August 24 – 4 September 2020
Online Only, United States**

*Sponsored and Published by
SPIE*

Volume 11506

Proceedings of SPIE 0277-786X, V. 11506

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Communication and Propagation through the Atmosphere and Oceans IX, edited by Jaime A. Anguita,
Jeremy P. Bos, David T. Wayne, Proc. of SPIE Vol. 11506, 1150601 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2581625

Proc. of SPIE Vol. 11506 1150601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Communication and Propagation through the Atmosphere and Oceans IX*, edited by Jaime A. Anguita, Jeremy P. Bos, David T. Wayne, Proceedings of SPIE Vol. 11506 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FREE SPACE OPTICAL COMMUNICATIONS

- 11506 03 **Demonstration of an FSO/RF hybrid-communication system on aeronautical and space applications** [11506-2]
- 11506 04 **High data-rate optical communication payload for CubeSats** [11506-3]
- 11506 05 **Impact of Reed Solomon forward error correction code in enhancing performance of free space optical communication link** [11506-4]
- 11506 06 **Study of fog mitigation in low-cost visible band FSO communication system** [11506-5]

OCEAN OPTICS

- 11506 09 **Measurement of the orbital angular momentum spectrum of light through turbid water using modal decomposition** [11506-8]

BROADBAND AND ULTRASHORT PULSED LASERS

- 11506 0D **Exploring the behavior of supercontinuum laser sources in atmospheric turbulence (Invited Paper)** [11506-12]
- 11506 0F **Femtosecond multifilament arrays in air using diffraction optical elements** [11506-14]

ORBITAL ANGULAR MOMENTUM

- 11506 0H **Propagation of Laguerre-Gaussian and l_m Bessel beams through atmospheric turbulence: a computational study** [11506-16]
- 11506 0I **Measurement of the orbital angular momentum spectrum of light through artificial turbulence by interferometry** [11506-17]

ATMOSPHERIC CHARACTERIZATION: JOINT SESSION WITH 11506 AND 11508

- 11506 0J **Profiling atmospheric turbulence using dual-camera imagery of non-cooperative targets (Invited Paper)** [11506-18]

IMAGING THROUGH TURBULENCE: JOINT SESSION WITH 11506 AND 11508

11506 OP **Complete wavefront reconstruction of perturbed singular beams by single-pixel phase retrieval**
[11506-24]

POSTER SESSION

11506 OS **Method on improving the performance of the optical phased array with large number of emitting elements** [11506-26]

11506 OU **Investigation of demultiplexer in Laguerre-Gaussian mode multiplexing for optical wireless communication** [11506-28]
