SPIE

Volume 11535

Proceedings of SPIE 0277-786X, V. 11535

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing Technologies and Applications in Urban Environments V, edited by Thilo Erbertseder,
Nektarios Chrysoulakis, Ying Zhang, Proc. of SPIE Vol. 11535, 1153501 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2584611

Proc. of SPIE Vol. 11535 1153501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

URBAN AIR QUALITY AND CLIMATE

- 11535 04 **Urban landscapes and night time urban heat island** [11535-2]
- 11535 05 **Analysis of urban green spaces and surface temperature using quantitative remote sensing technology in Bangkok** [11535-3]
- 11535 06 **Opportunities to monitor the urban atmospheric turbulence using unmanned aerial system** [11535-4]

SMART CITIES

- 11535 0A **Concept of an autonomous mobile robotic system for bridge inspection** [11535-8]
- 11535 0B **Efficient streaming of 3D maps for unmanned navigation: 3D filling the navigable space and eliminating occluded geometry** [11535-9]

URBAN LAND USE

- 11535 0C **Leveraging spatial structure with CapsuleNet for identification of the land use classes** [11535-10]
- 11535 0E **Spatiotemporal monitoring and prediction of land use/land cover changes using CA-Markov chain model: a case study in Orkhon Province, Mongolia** [11535-12]
- 11535 0G **Automatic detection of potential buried archaeological sites in Saruq Al-Hadid, United Arab Emirates** [11535-14]

URBAN PLANNING

- 11535 0H **Identifying urban sprawl by night lights a pending issue** [11535-15]
- 11535 0J **Time series formation based on VIIRS 24h data** [11535-17]
- 11535 0K **From probabilistic to possibilistic fusion and classification approach of satellite multisource and multitemporal images** [11535-18]
- 11535 0M **SAR and optical image fusion for urban infrastructure detection and monitoring** [11535-20]
