Vol. 22 No. 58

Saratov Fall Meeting 2020

Computations and Data Analysis: from Molecular Processes to Brain Functions

Dmitry E. Postnov
Editor

29 September – 2 October 2020
Saratov, Russian Federation

Sponsored by

SPIE

Volume 11847

Proceedings of SPIE, 1605-7422, V. 11847

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Saratov Fall Meeting 2020: Computations and Data Analysis: from Molecular Processes to Brain Functions, edited by Dmitry E. Postnov, Proc. of SPIE Vol. 11847, 1184701

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Saratov Fall Meeting 2020: Computations and Data Analysis: from Molecular Processes to Brain Functions*, edited by Dmitry E. Postnov, Proc. of SPIE 11847, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vi *Conference Organizers*

MATHEMATICAL MODELING OF LIVING SYSTEMS

11847 02 **Topological classification of population activity in spiking neural network** [11847-38]

11847 03 **A class of simple networks for modeling spike-wave discharges** [11847-6]

11847 04 **Good neighbors? Astrocyte connectivity defines repeatable patterns of calcium waves** [11847-10]

11847 05 **Modulatory effect of NCX on IP_3-dependent Ca^{2+} oscillations in astrocytes** [11847-11]

11847 06 **Computational realization of non-linear diffusion generalizing Barenblatt-Pattle's approach on the case of flows' simulations in elastic microvessels** [11847-2]

11847 07 **Mathematical modeling of cavity development in lung tuberculosis** [11847-3]

11847 08 **The dynamical premise for desynchrony between circadian rhythm and the sleep-wake cycle** [11847-9]

11847 09 **Mathematical model of COVID-19 pandemic based on a retarded differential equation** [11847-5]

ADVANCED METHODS FOR PROCESSING OF PHYSIOLOGICAL SIGNALS

11847 0A **An alternative method to quantify the pulse waveform** [11847-12]

11847 0B **Application of recurrent analysis to the determination of connections between EEG data channels** [11847-15]

11847 0C **Use of adaptive window wavelet neural networks to solve inverse problems of spectroscopy** [11847-22]

11847 0D **Spectral characteristics of photoplethysmographic indicators of human peripheral vascular tone** [11847-23]

11847 0E **Detection of special points in a photoplethysmogram** [11847-25]

11847 0F **Analysis of muscle activation patterns during equilibrium seeking activity** [11847-26]

11847 0G **Method for analyzing the inhibition of cellular signals in the spike train format** [11847-28]

11847 0H **External stimulus classification by Hodgkin-Huxley neural network** [11847-31]

11847 0I **Directional control of spin-wave transport in tunable spin-photonic YIG/Fe-Rh bilayer structure for signal processing** [11847-7]

11847 0J **Tunable spin-wave coupling in lateral arrays of magnonic structures for magnonic logic applications** [11847-16]

BRAIN STUDIES

11847 0K **Study of alpha-rhythm in patients with headache and sleep disorders** [11847-14]

11847 0L **The study of changes in EEG activity in spatial tasks in disabilities children in primary school** [11847-17]

11847 0M **The changes of oscillation patterns in experimental signals by behavioral sleeping and wakefulness** [11847-18]

11847 0N **A study of synchronization between rats ECoG channels under the anesthesia** [11847-19]

11847 0O **The spatial changes in the EEG during odors impacts** [11847-20]

11847 0P **The study of statistical characteristics of adaptation process to monotonous activity** [11847-21]

11847 0Q **Approach to collaborative BCI for enhancing human-to-human interaction in shared visual task** [11847-27]

11847 0R **Influence of the sensory information complexity on the features of low frequency rhythms of human EEG** [11847-29]

11847 0S **Synchronization in the inhibitory coupled Hodgkin-Huxley neural networks** [11847-30]

11847 0T **Peculiarities of brain activity sources in the process of motor acts imagination** [11847-34]

11847 0U **Artificial neural network predicts inter-areal functional connectivity** [11847-35]

11847 0V **Age-related changes in the brain functional connectivity during motor initiation** [11847-37]
