Volume 12467

Proceedings of SPIE, 1605-7422, V. 12467

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2023: Image Perception, Observer Performance, and Technology Assessment, edited by Claudia R. Mello-Thoms, Yan Chen, Proc. of SPIE Vol. 12467, 1246701
© 2023 SPIE · 1605-7422 · doi: 10.1117/12.2681950

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

VISUAL SEARCH

12467 03 **Comparing experts to novices: reduced satisfaction of search when searching with virtual breast tomosynthesis** [12467-1]

12467 04 **A training program to reduce reader search errors for liver metastasis detection in CT** [12467-2]

12467 05 **Optimal visual search strategy with inter-saccade response correlations** [12467-3]

12467 06 **Challenges and solutions to processing and visualising eye tracking data from digital pathology studies** [12467-4]

BREAST

12467 07 **Identifying and preventing fatigue in digital breast tomosynthesis** [12467-5]

12467 08 **Global mammographic radiomic signature can predict radiologists' difficult-to-interpret normal cases** [12467-6]

12467 09 **A comparative study of diagnostic performance and work experience of radiologists in three countries interpreting digital breast tomosynthesis** [12467-7]

12467 0A **False-negative diagnosis might occur due to absence of the global radiomic signature of malignancy on screening mammograms** [12467-8]

12467 0B **Investigating the error-making patterns in reading high-density screening mammograms between radiologists from two countries** [12467-9]

AI: JOINT SESSION WITH CONFERENCES 12465 AND 12467

12467 0C **Longitudinal robustness of a thoracic radiographic AI model for COVID-19 severity prediction** [12467-10]

12467 0D **Developing and assessing an AI-based multi-task prediction system to assist radiologists detecting lung diseases in reading chest x-ray images** [12467-11]

12467 0E **Assistance tools for the evaluation of machine learning algorithm performance: the decision tree-based tools developed by the Medical Imaging and Data Resource Center (MIDRC) Technology Development Project (TDP) 3c effort** [12467-12]

MODEL OBSERVERS AND STATISTICAL ANALYSES

12467 0F **Obuchowski-Rockette analysis for Multi-Reader Multi-Case (MRMC) readers-nested-in-test study design with unequal numbers of readers or cases** [12467-13]

12467 0G **Approximating the idea observer on list mode data with comparison to CNN methods** [12467-14]

12467 0H **Predictive accuracy of model observers in lesion discrimination tasks** [12467-15]

12467 0I **Estimating task-based performance bounds for image reconstruction methods by use of learned-ideal observers** [12467-16]

ARTIFICIAL INTELLIGENCE I

12467 0J **Convolutional neural networks detect cells in densely packed images at performance levels similar to human readers** [12467-17]

12467 0K **Full-field digital mammogram retrieval using Fourier feature-based auto-encoder: application in breast cancer screening training** [12467-18]

12467 0L **Investigation of demographic implicit discrimination and disparate impact in chest radiography image-based AI for COVID-19 severity prediction** [12467-19]

12467 0M **How do you solve a problem like concordance? a study of radiologists' clinical annotations for mammographic AI training** [12467-20]

12467 0N **Spatiotemporal image quality in medical extended reality** [12467-21]

ARTIFICIAL INTELLIGENCE II

12467 0O **An observer comparison study to evaluate a machine learning model to quantify the infected pneumonia on lung CT images** [12467-22]

12467 0P **A user interface to communicate interpretable AI decisions to radiologists** [12467-23]

12467 0Q **Analysis of a pilot study collecting pathologist annotations for validating machine learning algorithms** [12467-24]

12467 0R **Need for objective task-based evaluation of AI-based segmentation methods for quantitative PET** [12467-25]

12467 0S **Observer study-based evaluation of TGAN architecture used to generate oncological PET images** [12467-26]

12467 0T **A visibility overshoot index for interventional x-ray image quality assessment** [12467-27]

TECHNOLOGY ASSESSMENT

12467 0U **Optimizing data acquisition in undersampled Magnetic Resonance Imaging (MRI) using two Alternative Forced Choice (2-AFC) and search tasks** [12467-28]

12467 0V **Adaptive Laguerre-Gauss channels for detection and search of irregularly shaped lesions** [12467-29]

12467 0W **Discriminability of non-Gaussian noise properties in CT** [12467-30]

12467 0X **Influence of magnet strength on background parenchymal enhancement evaluation** [12467-31]

POSTER SESSION

12467 0Y **Configuring medical displays for high- and stable-image contrast in bright rooms** [12467-32]

12467 0Z **Comparison of radiologists' interpretation efficiency with radiographs: standard 6 MP versus 12 MP high-resolution display monitors** [12467-33]

12467 10 **Comparative tests between actual and simulated digital mammography images for new computer schemes evaluation database** [12467-34]

12467 11 **Automatic assessment of skeletal maturity in adolescent idiopathic scoliosis patients using support vector regression on deep features** [12467-35]

12467 12 **Evaluation of multiparametric MRI for deep learning-based segmentation of Wilms tumor** [12467-36]

12467 13 **Assessment of cerebral vascular abnormality quantification technique to aid aneurysm localization** [12467-39]

12467 14 **Assessing the impact of correlated noise in digital mammography: a virtual clinical trial (Cum Laude Poster Award)** [12467-40]

12467 15 **Diagnostic performance characteristics of Chinese radiologists in breast cancer detection with FFDM versus DBT images** [12467-41]

12467 16 **Task-aware denoising autoencoders for establishing efficient channels** [12467-44]

12467 17 **Evaluating generative stochastic image models using task-based image quality measures** [12467-45]

12467 18 **A progress in diagnostic performances of Vietnamese doctors in reading mammograms with different Level of breast density via the VIETRAD program** [12467-46]

12467 19 **A task-specific deep-learning-based denoising approach for myocardial perfusion SPECT** [12467-47]

12467 1A **Attention-guided single-voxel attacks for 3-dimensional neural networks: experiments with post-mortem CT segmentation** [12467-48]

DIGITAL POSTER SESSION

12467 1B **Novel concept for systematic testing of AI models for MRI acquisition shifts with simulated data** [12467-37]

12467 1C **Utilizing network analysis in blinded independent central review for clinical trials as adjudication agreement dashboard** [12467-38]

12467 1D **High-quality label-free prediction of fluorescence images through stimulated Raman scattering imaging and recurrent deep neural network** [12467-42]

12467 1E **Predictive adjudication rate modeling for prioritizing case distribution in BICR for oncology clinical trials** [12467-43]

Conference Committee

Symposium Chairs

Robert M. Nishikawa, University of Pittsburgh (United States)
Despina Kontos, University of Pennsylvania, Department of Radiology (United States)

Conference Chairs

Claudia R. Mello-Thoms, University Iowa Carver College of Medicine (United States)
Yan Chen, The University of Nottingham (United Kingdom)

Conference Program Committee

Craig K. Abbey, University of California, Santa Barbara (United States)
Mark A. Anastasio, Washington University in St. Louis (United States)
Susan M. Astley, The University of Manchester (United Kingdom)
Jongduk Baek, Yonsei University (Korea, Republic of)
François O. Bochud, Centre Hospitalier Universitaire Vaudois (Switzerland)
Jovan G. Brankov, Illinois Institute of Technology (United States)
Brandon D. Gallas, U.S. Food and Drug Administration (United States)
Howard C. Gifford, University of Houston (United States)
Stephen L. Hillis, The University of Iowa (United States)
Elizabeth A. Krupinski, Emory University School of Medicine (United States)
Matthew A. Kupinski, College of Optical Sciences, The University of Arizona (United States)
Sarah J. Lewis, The University of Sydney (Australia)
Mark F. McEntee, University College Cork (Ireland)
Robert M. Nishikawa, University of Pittsburgh (United States)
Ljiljana Platiša, Universität Gent (Belgium)
Ingrid S. Reiser, The University of Chicago (United States)
Frank W. Samuelson, U.S. Food and Drug Administration (United States)
Sian Taylor-Phillips, The University of Warwick (United Kingdom)
Pontus A. Timberg, Scanias University Hospital (Sweden)
