## **Classification of Remote Sensing Images**

**Lin Liu**  
**Xia Li**  
**Kai Liu**  
**Xinchang Zhang**  
*Editors*

**28–29 June 2008**  
**Guangzhou, China**

*Organized by*

Sun Yat-sen University (China) • University of Cincinnati (USA) • CPGIS—The International  
Association of Chinese Professionals in Geographic Information Sciences

*Co-organized by*

Guangzhou Institute of Geography (China) • South China Normal University (China) • Guangdong  
Institute of Eco-Environmental and Soil Sciences (China) • Guangdong Association of Remote  
Sensing and Geographic Information Systems (China)

*Sponsored by*

NSFC—National Natural Science Foundation of China

*Published by*

SPIE

**Volume 7147**

Proceedings of SPIE, 0277-786X, v. 7147

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Geoinformatics 2008 and Joint Conference on GIS and Built Environment: Classification of Remote Sensing Images*, edited by Lin Liu, Xia Li, Kai Liu, Xinchang Zhang, Proceedings of SPIE Vol. 7147 (SPIE, Bellingham, WA, 2008) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a similar font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

---

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

## SESSION 1 REMOTE SENSING IMAGE CLASSIFICATION

---

7147 02	<b>Study on classification method of TM image with artificial neural network</b> [7147-01] Z. Liu, W. Ya, J. Xu, South China Agricultural Univ. (China)
7147 03	<b>Thematic information extraction and background parameters analysis in remote sensing classification</b> [7147-02] X. Wei, Shanxi Agricultural Remote Sensing Application Institute (China); Y. Qiao, Taiyuan Univ. of Technology (China); S. Zhao, Xinjiang Institute of Ecology and Geography (China)
7147 04	<b>Feature matching algorithm based on spatial similarity</b> [7147-03] W. Tang, Y. Hao, Y. Zhao, N. Li, Harbin Engineering Univ. (China)
7147 05	<b>Land cover classification based on typical indices combinations of MODIS NDVI time series</b> [7147-04] Z. Du, Y. Zhan, C. Wang, Institute of Remote Sensing Applications (China)
7147 06	<b>New methods of H-SVMs for the classification of multi-spectral remote sensing imagery</b> [7147-05] H. Bin, Wuhan Univ. (China)
7147 07	<b>Extraction of ore-searching information of uranium deposit based on high spatial resolution satellite data</b> [7147-06] X. Yang, D.-C. Liu, J.-L. Zhang, Beijing Research Institute of Uranium Geology (China)
7147 08	<b>A software tool for calculating the urban compactness from remote sensing classification image</b> [7147-07] J. Zhang, South China Normal Univ. (China); X. Fu, China Univ. of Geosciences (China); X. Wang, South China Normal Univ. (China); S. Hu, Guangdong Land and Resources Information Ctr. (China)
7147 09	<b>Classification of airborne laser scanning data based on statistics of height information</b> [7147-08] H. Wu, Tongji Univ. (China); C. Liu, Tongji Univ. (China) and Key Lab. of Advanced Engineering Surveying of SBSM (China)
7147 0A	<b>The application of mixed GA-BP algorithm on remote sensing image classification</b> [7147-09] W. Zhou, East China Univ. of Technology (China); G. Xie, South China Agricultural Univ. (China); B. Liu, East China Univ. of Technology (China)

- 7147 0B **Potential application of remote sensing in monitoring informal settlements in South Africa where complimentary data does not exist** [7147-10]  
K. Busgeeth, Council for Scientific and Industrial Research (South Africa); F. van den Bergh, Meraka Institute, CSIR (South Africa); J. Whisken, A. Brits, Council for Scientific and Industrial Research (South Africa)
- 7147 0C **An integrated approach using ISODATA and SVR to land cover classification: an example of wheat** [7147-11]  
J. Zhang, Y. Pan, C. Yi, Beijing Normal Univ. (China); Q. Ma, Renmin Univ. of China (China); C. Xu, Beijing Normal Univ. (China)
- 7147 0D **An evaluation of classification methods for level II land-cover categories in Ohio** [7147-12]  
R. C. Frohn, L. Liu, R. A. Beck, N. Chaudhary, O. Arellano-Neri, Univ. of Cincinnati (United States)
- 7147 0E **Classification of land cover from remote sensing fused image based on ICA-SVM and D-S evidence theory** [7147-13]  
M. Chen, Capital Normal Univ. (China); Y. Fu, South China Normal Univ. (China); T. Sun, D. Li, Q. Qin, Wuhan Univ. (China)
- 7147 0F **The application of high spatial resolution remote sensing image for vegetation type recognition in Dagou Valley** [7147-14]  
A. Yang, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate Univ. of Chinese Academy of Sciences (China); C. Liu, Institute of Geographical Sciences and Natural Resources Research (China); J. Fan, Institute of Mountain Hazards and Environment (China); J. Zhao, J. Tan, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate Univ. of Chinese Academy of Sciences (China)
- 7147 0G **Endmembers extraction of wheat based on time series of MODIS-NDVI and TM samples data** [7147-15]  
X. Liu, K. Zhong, W. Liu, Guangzhou Institute of Geography (China); Y. Pan, Beijing Normal Univ. (China)
- 7147 0H **Comparison of land cover classification methods based on single-temporal MODIS data** [7147-16]  
T. Han, China Meteorological Administration (China); X. Xu, Lanzhou Univ. (China); Y. Li, China Meteorological Administration (China); Y. Xie, Lanzhou Univ. (China)
- 7147 0I **Beijing-1 small satellite multi-spectrum image classification based on neighborhood EM algorithm and its uncertainty assessment** [7147-17]  
B. He, Univ. of Electronic Science and Technology of China (China) and Beijing Landview Mapping Information Technology Cooperation (China)

---

## SESSION 2 SPATIAL ALGORITHMS FOR FEATURE EXTRACTION AND PATTERN DETECTION

- 7147 0J **Semi-automatic extraction of ribbon roads from high resolution remotely sensed imagery by T-shaped template matching** [7147-18]  
X. Lin, Chinese Academy of Surveying and Mapping (China) and Wuhan Univ. (China); J. Zhang, Z. Liu, Chinese Academy of Surveying and Mapping (China); J. Shen, Wuhan Univ. (China)

- 7147 OK **Detection of clusters and outlying nodes in spatial networks** [7147-19]  
J. Zhou, Beijing Academy of Agriculture and Forestry Sciences (China) and Institute of Remote Sensing Applications (China); C. Zhao, J. Wang, L. Qi, W. Huang, Beijing Academy of Agriculture and Forestry Sciences (China)
- 7147 OL **A comparison of several raw data compression algorithms for acquisition of remotely sensed data** [7147-20]  
M. Zhou, Academy of Opto-Electronics (China); Y. Deng, Z. Zhang, Institute of Electronics (China); L. Tang, C. Li, Academy of Opto-Electronics (China)
- 7147 OM **Building detection and extraction from monocular imagery by pose clustering and matrix search algorithm** [7147-21]  
S. Cui, Q. Yan, Z. Liu, Chinese Academy of Surveying and Mapping (China); M. Li, Shandong Univ. of Science and Technology (China)
- 7147 ON **A sub-pixel based method to extract and interpret information from image and its preliminary application** [7147-22]  
H. Li, Guangzhou Institute of Geochemistry (China) and South China Normal Univ. (China); Y. Wang, Guangzhou Institute of Geochemistry (China); Y. Cao, South China Normal Univ. (China); X. Wang, Guangzhou Institute of Geochemistry (China) and South China Normal Univ. (China)
- 7147 OO **Road extraction from high resolution remote sensing image based on mathematics morphology** [7147-23]  
H. Ma, Y. Zhao, Y. Chen, Northeastern Univ. (China)
- 7147 OP **Extraction of information of targets based on frame buffer** [7147-24]  
L. Han, Q. Kong, X. Zhao, Shandong Univ. of Science and Technology (China)
- 7147 OQ **Extracting shelter forest in semi-arid sandy area based on Landsat ETM+ imagery** [7147-25]  
X. Qi, F. Huang, Y. Qi, Northeast Normal Univ. (China)
- 7147 OR **Feature extraction and scale analysis based on Quickbird image using object-oriented approach** [7147-26]  
Y. Qi, F. Huang, X. Qi, Northeast Normal Univ. (China)

---

### SESSION 3 REMOTE SENSING IMAGE PROCESSING

---

- 7147 OS **Acquiring height distribution information about high-rises in Beijing using shadow in SPOT-5** [7147-27]  
Z. Ye, Capital Normal Univ. (China); C. Deng, Sun Yat-sen Univ. (China); H. Gong, Capital Normal Univ. (China)
- 7147 OT **A raster: relation-vector: entity integrated approach for spatial geographic feature retrieval** [7147-28]  
L. Huang, L. Fei, B. Zheng, Wuhan Univ. (China)
- 7147 OU **High-accuracy ellipse feature extraction algorithm based on line diffusion function model** [7147-29]  
S. Zheng, C. Li, Wuhan Univ. (China)

- 7147 0V **High Quality Prime Farmland extraction pattern based on object-oriented image analysis** [7147-30]  
Y. Liu, M. Li, Z. Chen, F. Li, Y. Zhang, B. Zhao, L. Tan, Nanjing Univ. (China)
- 7147 0W **Research on texture feature of RS image based on cloud model** [7147-31]  
Z. Wang, Chongqing Univ. of Posts and Telecommunications (China) and Peking Univ. (China); L. Xue, Chongqing Univ. of Posts and Telecommunications (China)
- 7147 0X **Research on edge detection algorithm of RS image** [7147-32]  
L. Xue, Z. Wang, Chongqing Univ. of Posts and Telecommunications (China)
- 7147 0Y **A robust registration method for high resolution remote sensing images** [7147-33]  
Y. Wu, Y. Ming, Wuhan Univ. (China)
- 7147 0Z **Image mosaicking from aerial unmanned airplane** [7147-34]  
T. Wang, J. Gong, Institute of Remote Sensing Applications (China)
- 7147 10 **Cloud detection in MODIS data based on spectrum analysis and snake model** [7147-35]  
W. Li, D. Li, Wuhan Univ. (China)
- 7147 11 **A rigorous attitude estimation method for satellite attitude determination based on star sensor** [7147-36]  
J. Xie, J. Gong, W. Jiang, Wuhan Univ. (China)
- 7147 12 **Comparison research of algorithms about ortho-rectification for remote sensing image** [7147-37]  
Q. Luan, H. Liu, X. Wang, W. Huang, X. Zhou, Beijing Normal Univ. (China)
- 7147 13 **A new remotely sensed image fusion using wavelet packet transform with the best basis** [7147-38]  
Z. Wang, H. Wang, A. Zhang, M. Wu, Ludong Univ. (China)
- 7147 14 **A variational image restoration with spatially varying noise** [7147-39]  
Z. Bao, East China Normal Univ. (China); H. Bai, Shanghai Remote Sensing and Applied Measurement Ctr. (China); R. Liu, Chongqing Institute of Technology (China); C. Shen, East China Normal Univ. (China)
- 7147 15 **Variational method of speckle reduction and boundary detection in SAR imagery** [7147-40]  
Z. Xia, X. Tang, F. Li, G. Zhang, East China Normal Univ. (China)
- 7147 16 **The qualitative analyses of cloud cover on optical satellite image** [7147-41]  
C.-H. Liu, M.-L. Yeh, T.-Y. Chou, L.-S. Yang, Feng Chia Univ. (Taiwan)
- 7147 17 **The atmospheric correction algorithm for HY-1B/COCTS** [7147-42]  
X. He, Y. Bai, D. Pan, Q. Zhu, State Oceanic Administration (China)
- 7147 18 **The quasi-analytic remote sensing algorithm of CDOM in the China Yellow Sea and East Sea** [7147-43]  
Y. Bai, D. Pan, X. He, F. Gong, State Oceanic Administration (China)

---

**SESSION 4    HYPERSPECTRAL IMAGE ANALYSIS**

---

- 7147 19    **Incorporating spectral, texture, and shape information for high spatial resolution satellite imagery classification** [7147-44]  
Y. Zhao, China Univ. of Mining and Technology (China) and Jiangsu Key Lab. of Resources and Environmental Information Engineering (China); P. Du, China Univ. of Mining and Technology (China)
- 7147 1A    **Flat-earth phase removal algorithm improved with frequency information of interferogram** [7147-45]  
B. Ai, Sun Yat-sen Univ. (China); K. Liu, Guangzhou Institute of Geography (China); X. Li, D. H. Li, Sun Yat-sen Univ. (China)
- 7147 1B    **A method based on interest operator to transform LiDAT data into grey image** [7147-46]  
Q.-J. Gang, Sun Yat-sen Univ. (China) and Guangdong Univ. of Business Studies (China); Z.-H. Xia, Guangdong Univ. of Business Studies (China)
- 7147 1C    **High resolution surface sediment type mapping using hyperspectral image and field data in muddy intertidal flat area** [7147-47]  
D. Zhang, Y. Zhang, H. Li, Y. Xu, Nanjing Normal Univ. (China)
- 7147 1D    **On the performance of endmember extraction algorithms for hyperspectral image analysis** [7147-48]  
Q. Du, N. Raksuntorn, Mississippi State Univ. (United States)
- 7147 1E    **Remote sensing-based study on the relationship between land brightness temperature and vegetation abundance in Wuhan city** [7147-49]  
C. Zhang, H. Yu, P. Gong, W. Ju, H. Pei, Nanjing Univ. (China)
- 7147 1F    **Estimation of the spring wheat water and chlorophyll content in rainfed agriculture areas of Loess Plateau based on the spectral absorption feature of the liquid water and chlorophyll** [7147-50]  
X. Wang, N. Guo, K. Zhang, H. Zhao, Lanzhou Institute of Arid Meteorology (China)
- 7147 1G    **Research of image preprocessing methods for EO-1 Hyperion hyperspectral data in tidal flat area** [7147-51]  
H. Li, D. Zhang, Y. Zhang, Y. Xu, Nanjing Normal Univ. (China)
- 7147 1H    **A partial least square regression method to quantitatively retrieve soil salinity using hyperspectral reflectance data** [7147-52]  
Y. Qu, Beijing Normal Univ. (China); S. Jiao, Beijing Vocational and Technical Institute of Industry (China); X. Lin, Beijing Normal Univ. (China)
- 7147 1I    **Semi-supervised classification for hyperspectral remote sensing image based on PCA and kernel FCM algorithm** [7147-53]  
X. Liu, Univ. of Electronic Science and Technology of China (China) and Sichuan Univ. of Science and Engineering (China); B. He, X. Li, Univ. of Electronic Science and Technology of China (China)

- 7147 1J **A genetic algorithm based wrapper feature selection method for classification of hyperspectral images using support vector machine** [7147-54]  
L. Zhuo, Sun Yat-sen Univ. (China); J. Zheng, Guangdong Climate Ctr. (China); X. Li, Sun Yat-sen Univ. (China); F. Wang, Sun Yat-sen Univ. (China) and Guangzhou Univ. (China); B. Ai, J. Qian, Sun Yat-sen Univ. (China)

## Symposium Committees

### *Honorary Chairs*

**Guanhua Xu**, Academician, Chinese Academy of Sciences (China)  
**Deren Li**, Academician, Chinese Academy of Sciences, Wuhan University (China)

### *Conference Chairs*

**Xia Li**, School of Geography and Planning, Sun Yat-sen University (China)  
**Lin Liu**, Department of Geography, University of Cincinnati (United States)

### *Proceedings Editor-In-Chief*

**Lin Liu**, Department of Geography, University of Cincinnati (United States)  
**Xia Li**, School of Geography and Planning, Sun Yat-sen University (China)

### *International Steering Committee*

**M.F. Goodchild**, University of California, Santa Barbara (USA)  
**Michael Batty**, University College London (United Kingdom)  
**John R. Townshend**, University of Maryland, College Park (USA)  
**Robert McMaster**, University of Minnesota (USA)  
**Harvey Miller**, University of Utah (USA)  
**Nina Lam**, Louisiana State University (USA)  
**Mark Gahegan**, Penn State University (USA)  
**Qingxi Tong**, Institute of Remote Sensing Application, Chinese Academy of Sciences (China)  
**Xiaowen Li**, Beijing Normal University (China) and Institute of Remote Sensing Application, Chinese Academy of Sciences (China)  
**Gar-on Yeh**, University of Hong Kong (China)  
**Jiyuan Liu**, Institute of Geographical Sciences and Natural Resources Research, Chinese Academy of Sciences (China)  
**Jun Chen**, National Center for Geomatics (China)  
**Yimin Jin**, National Remote Sensing Center (China)  
**Lizhong Yu**, East China Normal University (China)  
**Peijun Shi**, Beijing Normal University (China)  
**Ke Liao**, Institute of Geographical Sciences and Natural Resources Research, Chinese Academy of Sciences (China)

**Jicheng Cheng**, Beijing University (China)  
**Xingyuan Huang**, Nanjing University (China)  
**Jigang Bao**, Sun Yat-sen University (China)

*Technical Committee*

**Fang Qiu**, *Chair*, University of Texas, Dallas (USA)  
**Xiaoxiang Chen**, *Chair*, Sun Yat-sen University (China)  
**Lin Liu**, *Chair*, Department of Geography, University of Cincinnati (United States)  
**Bingkai Ye**, *Chair*, Guangdong Association of Remote Sensing and Geographic Information Systems (China)  
**Shuming Bao**, University of Michigan (USA)  
**Richard Beck**, University of Cincinnati (USA)  
**Ling Bian**, State University of New York at Buffalo (USA)  
**Ruru Deng**, Sun Yat-sen University (China)  
**Yongjiu Dai**, Beijing Normal University (China)  
**John Eck**, University of Cincinnati (USA)  
**Robert Frohn**, University of Cincinnati (USA)  
**Huili Gong**, Capital Normal University (China)  
**Jianhua Gong**, Institute of Remote Sensing Applications, Chinese Academy of Sciences (China)  
**Jianya Gong**, Wuhan University (China)  
**Peng Gong**, Institute of Remote Sensing Applications, Chinese Academy of Sciences (China), University of California, Berkeley (USA), and Nanjing University (China)  
**Mei-Po Kwan**, Ohio State University (USA)  
**Yong Lao**, California State University, Monterey Bay (USA)  
**Bin Li**, Central Michigan University (USA)  
**Jing Li**, Beijing Normal University (China)  
**Qi Li**, Peking University (China)  
**Zhilin Li**, Hong Kong Polytechnic University (China)  
**Shunlin Liang**, University of Maryland, College Park (USA)  
**Hui Lin**, Chinese University of Hong Kong (China)  
**Yaolin Liu**, Wuhan University (China)  
**Guonian Lu**, Nanjing Normal University (China)  
**Mingming Lu**, University of Cincinnati (USA)  
**Liqiu Meng**, Technical University of Munich (Germany)  
**Jiaguo Qi**, University of Michigan (USA)

**Qiming Qing**, Peking University (China)  
**Yun Shao**, Institute of Remote Sensing Applications, Chinese Academy of Sciences (China)  
**Shih-Lung Shaw**, University of Tennessee (USA)  
**Wenzhong Shi**, Hong Kong Polytechnic University (China)  
**Daniel Dianzhi Sui**, Texas A&M University (USA)

**Xinming Tang**, Chinese Academy of Surveying and Mapping (China)  
**Vicent Tao**, Microsoft Corporation (USA)  
**Susanna Tong**, University of Cincinnati (USA)  
**James Uber**, University of Cincinnati (USA)

**Yingjie Wang**, Institute of Geographical Science and Resources  
Research, Chinese Academy of Sciences (China)  
**Jingfeng Wang**, Institute of Geographical Science and Resources  
Research, Chinese Academy of Sciences (China)  
**Fahui Wang**, Louisiana State University (USA)  
**Le Wang**, State University of New York at Buffalo (USA)  
**Xinhao Wang**, University of Cincinnati (USA)  
**Lixing Wu**, University of Mining & Technology (China)  
**David Wong**, George Mason University (USA)  
**Lun Wu**, Beijing University (China)  
**Bing Xu**, University of Utah (USA)  
**Qingnian Zhang**, Sun Yat-sen University (China)  
**Xinchang Zhang**, School of Geography and Planning, Sun Yat-sen  
University (China)  
**Chenghu Zhou**, Institute of Geographical Science and Resources  
Research, Chinese Academy of Sciences (China)  
**Qiming Zhou**, Hong Kong Baptist University (China)  
**A-Xing Zhu**, University of Wisconsin, Madison (USA)

*Local Organizing Committee*

**Xinchang Zhang**, *Chair*, School of Geography and Planning, Sun  
Yat-sen University (China)  
**Linyuan Xia**, *Chair*, Sun Yat-sen University (China)  
**Kai Liu**, Guangzhou Institute of Geography, Guangdong Academy of  
Sciences (China)  
**Qingnian Zhang**, Sun Yat-sen University (China)  
**Zhijian He**, Sun Yat-sen University (China)  
**Guoming Du**, Sun Yat-sen University (China)  
**Haiyan Tao**, Sun Yat-sen University (China)  
**Linbing Ma**, Sun Yat-sen University (China)  
**Holly Arnold**, University of Cincinnati (USA)

## Introduction

All papers included in this volume are selected from the 16th International Conference on Geoinformatics and the Joint Conference on GIS and Built Environment organized by Sun Yat-sen University and the University of Cincinnati and held 28–29 June 2008 in Guangzhou, China. The Geoinformatics conference series was initiated by the International Association of Chinese Professionals in Geographic Information Sciences (CPGIS) in 1992. The Joint Conference on GIS and Built Environment is a new conference series initiated by Sun Yat-sen University and the University of Cincinnati.

The central theme of the combined conference is GIS, Built Environment, and Geo-simulation. The main topics included geo-simulation and virtual GIS environments, the built environment and its dynamics, the monitoring and assessment of natural resources and environments, advanced spatial data models and analyses, and classification of remote sensing images.

This combined conference provided a unique forum for exchanging ideas and knowledge on geo-information sciences between GIS professionals worldwide. This year's Geoinformatics conference is the largest ever. Over 800 participants came from 15 countries and regions, including the United States, the United Kingdom, Canada, Germany, Australia, South Africa, Turkey, Singapore, Malaysia, Thailand, United Arab Emirates, Mainland China, Hong Kong, Macau, and Taiwan. The organizers received more than 900 abstracts, and nearly 600 full papers. The conference program consists of 212 oral presentations and over 300 posters.

All papers in this volume are selected through a rigorous peer-review process. We believe that you will find these papers useful.

Finally, we would like to thank all authors and reviewers for their contributions to this volume.

**Lin Liu and Xia Li**  
Conference Co-Chairs  
Editors-In-Chief
