Proc. of SPIE-OSA Vol. 11919 1191901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Translational Biophotonics: Diagnostics and Therapeutics*, edited by Zhiwei Huang, Lothar D. Lilge, Proc. of SPIE-OSA 11919, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BEYOND THE VISIBLE SPECTRUM: RAMPING UP THE RADIANT EXPOSURE

- 11919 02 **Arterial pressure responses of a rat to laser stimulation of the vagus nerve using infrared irradiation in continuous-wave mode** [11919-1]
- 11919 03 **Micro-lens arrays (MLA)-assisted fractional photothermal therapy for effective cancer treatment** [11919-2]
- 11919 04 **Laser coagulation of brain tissue at 1480 nm and 1940 nm wavelengths** [11919-3]
- 11919 05 **A novel method to estimate temperature depth profile using thermography** [11919-4]
- 11919 06 **Laser assisted restorative mineralization of dental enamel** [11919-5]
- 11919 07 **Fiber-based fluorescence and reflection measurements during laser lithotripsy** [11919-6]
- 11919 08 **Quantitative evaluations on EUS-guided laser ablation in ex-vivo and in-vivo porcine pancreas** [11919-7]
- 11919 09 **Ex-vivo model experimental and simulation results suggesting effective and superficial mucosal photothermal ablation at 1505 nm** [11919-8]

DIAGNOSTIC IMAGING I

- 11919 0A **Intraoperative assessment of patient bone viability using texture analysis of dynamic contrast-enhanced fluorescence imaging** [11919-9]
- 11919 0B **Fast antibiotic susceptibility testing via holographic imaging** [11919-10]
- 11919 0C **Hyperspectral imaging for perfusion assessment of the skin with convolutional neuronal networks** [11919-11]
- 11919 0D **Smartphone-based multimodal tethered capsule endoscopic platform for white-light, narrow-band, and fluorescence/autofluorescence imaging** [11919-12]

DIAGNOSTIC IMAGING II

- 11919 0E **Multimodal imaging platform for surgery: application to tissue status assessment** [11919-13]
- 11919 0F **Histological imaging of unstained cancer tissue samples by circularly polarized light** [11919-14]

- 11919 OG **Investigation on hyperspectral imaging derived indices for perfusion monitoring** [11919-15]
- 11919 OH **Multimodal imaging of snap-frozen AD human brain tissue** [11919-16]
- 11919 OI **Intraoperative resting state functional connectivity based on RGB imaging** [11919-17]
- 11919 OJ **Fluorescence-based handheld imaging device for in-vivo detection of oral precancer** [11919-18]

DIAGNOSTIC SPECTROSCOPY

- 11919 OK **Using diffuse reflectance spectroscopy probe tracking to identify non-tumour and tumour tissue in upper gastrointestinal specimens** [11919-19]
- 11919 OL **Detection of amelanotic melanoma on the basis of NIR autofluorescence features** [11919-20]
- 11919 OM **Accurate diagnosis of prostate cancer via infrared spectroscopy of breath** [11919-21]
- 11919 ON **Optical scattering as an early marker of apoptosis during chemotherapy and antiangiogenic therapy in murine models of prostate and breast cancer** [11919-22]
- 11919 OO **Two-wavelength excitation spectroscopy for non-invasive detection of the iron deficiency indicator zinc protoporphyrin IX** [11919-23]
- 11919 OP **Vasculature-based biomarkers and segmentation from hyperspectral images of murine peritonitis model** [11919-24]
- 11919 OQ **Multiple wavelength excitation 5-ALA induced PpIX fluorescence spectroscopy in guided neurosurgery for improving glioma classification** [11919-25]
- 11919 OR **Nonlinear spectroscopy for Fabry disease characterization based on cardiomyocytes** [11919-26]

EVERYTHING ABOUT THE BRAIN

- 11919 OS **Optical determination of superficial and deeper tissue biochemistry and microstructure for delineation and early detection of colorectal cancer** [11919-27]
- 11919 OT **Hybrid diffuse optics for bedside measurements of cerebral hemodynamics in a large cohort of stroke patients** [11919-28]
- 11919 OU **Assessment of the Alzheimer progression with multiwavelength Stokes polarimetry** [11919-29]
- 11919 OV **A laser Doppler system for long-term recording of cerebral microcirculation in the neurointensive care unit** [11919-30]

- 11919 OW **A multipurpose integrated preclinical device for the treatment of glioblastoma [11919-31]**
- 11919 OX **Dynamics of cerebral cortex blood flow and tissue abnormalities induced by acute respiratory disorders [11919-32]**
- 11919 OY **Retardance map of brain white matter: a potential game changer for the intra-operative navigation during brain tumor surgery [11919-33]**
- 11919 OZ **Three-dimensional holographic projection of brain tumor progression [11919-34]**

MICROSCOPY

- 11919 10 **Translation of third and second harmonic generation microscopy into the clinic for the assessment of fresh lung tumor tissue [11919-35]**
- 11919 11 **Assessing pain in a noninvasive manner by measuring changes in the microcirculation [11919-36]**
- 11919 12 **Digital histo-biophotonics: embossed topographic depolarization mapping of tissue samples [11919-37]**
- 11919 13 **Nonlinear multicontrast microscopy with texture analysis for colon cancer diagnostics [11919-38]**
- 11919 14 **Three-dimensional virtual histology in unprocessed resected tissues with photoacoustic remote sensing (PARS) microscopy and optical coherence tomography [11919-39]**
- 11919 15 **Novel techniques for embryo microsurgery based on femtosecond lasers for applications in assisted reproductive technologies [11919-40]**
- 11919 16 **Automated analysis of polarimetric images for the diagnostics of gastric biopsies [11919-41]**

NEW DIRECTIONS AND NEW INDICATIONS

- 11919 17 **HEMOCOVID-19 study: an international clinical study to evaluate microvascular and endothelial impairments in severe COVID-19 patients using near-infrared spectroscopy [11919-42]**
- 11919 18 **Phase-sensitive optical coherence elastography with a 3.2 MHz FDML-laser using focused air-puff tissue indentation [11919-43]**
- 11919 19 **VASCOVID: an integrated platform to evaluate endothelial and microvascular impairment in severe COVID-19 patients [11919-44]**
- 11919 1A **Towards highly-sensitive point-of-care diagnostics with common-path interferometric dielectric nanostructures [11919-45]**

- 11919 1B **Screening of viral growth kinetic and drug inhibition of HSV-1 infected human cells by surface plasmon resonance method** [11919-46]
- 11919 1C **Enhancing contrast of in-vivo human retinal ganglion cells with multi-offset adaptive optics scanning laser ophthalmoscope** [11919-47]

OCT AND OTHER TECHNIQUES

- 11919 1D **Swept-sources for OCT are perceived due to two-photon vision** [11919-48]
- 11919 1E **1.6 MHz FDML OCT for intraoperative imaging in neurosurgery** [11919-49]
- 11919 1F **Towards an opto-thermo-acoustic (OTA)-based diagnostic tool to delineate adjacent normal from cancerous tissue for cancer margin assessment** [11919-50]
- 11919 1G **Quantification of radiation-induced microvasculature changes using optical coherence tomography and dynamic contrast enhanced MRI** [11919-51]
- 11919 1H **Assessment of muscular sustained fatigue: a TD-NIRS and sEMG study** [11919-52]
- 11919 1I **Crystalline lens curvature and thickness obtained with a slit-scanning system: preliminary results** [11919-53]

PHOTODYNAMIC THERAPY

- 11919 1J **Fluorescence and optoacoustics monitoring of tumor treatment with novel agents for combined photodynamic and chemotherapy** [11919-54]
- 11919 1K **Red and blue light in photodynamic therapy with chlorin-based photosensitizers** [11919-55]
- 11919 1L **Development of fluorescence cystoscope system for extension of diagnosis depth in 5-aminolevulinic acid mediated photodynamic diagnosis of bladder cancer** [11919-56]
- 11919 1M **Antibiofilm activity of photodynamic therapy with a novel dual photosensitizer incorporated mesoporous silica nanoparticle and laser system** [11919-57]
- 11919 1N **Dual-wavelength fluorescence imaging of chlorin-based photosensitizers** [11919-58]
- 11919 1O **Investigation on treatment light transmission changes during IPDT in comparison to T1 hyperintensity in early post-therapeutic T1-weighted MRI** [11919-59]

RAMAN

- 11919 1P **Combined fingerprint and high wavenumber spatially offset Raman spectroscopy for depth-resolved hydration and biochemical assessment** [11919-60]

- 11919 1Q **Quantitative measurement of low-concentration analytes using Raman spectroscopy during droplet evaporation for therapeutic drug monitoring** [11919-61]
- 11919 1R **Determination of spatially offset Raman spectroscopy geometry suitable for human hand bone quality assessment** [11919-62]
- 11919 1S **Stimulated Raman scattering microscopy reveals silicone in breast tissue** [11919-63]
- 11919 1T **Lab-on-fiber SERS optrodes for biological target detection** [11919-64]

POSTER SESSION I

- 11919 1U **Multispectral retinography in healthy adult population** [11919-65]
- 11919 1V **Application of Raman spectroscopy for the detection of colored tattoo inks in tissues: preliminary phantom study** [11919-66]
- 11919 1W **Simultaneous blood perfusion and fluorescence lifetime measurements in skin of healthy volunteers** [11919-67]
- 11919 1X **Novel random laser-based probe of Huntington disease in cell cultures** [11919-68]

POSTER SESSION II

- 11919 1Y **Effect of pre- and post- device calibration on physiological parameters for single fiber reflectance measurements** [11919-69]
- 11919 1Z **Brightness controller optimization for the digital diaphanoscopy system** [11919-70]
- 11919 20 **Influence of the body position on skin blood microcirculation measured by wearable laser Doppler sensors** [11919-71]
- 11919 21 **Rehabilitation monitoring after bed rest in elderly: TD-NIRS and sEMG preliminary study** [11919-72]
- 11919 22 **Fluorescence lifetime optical biopsy of the hepatocellular carcinoma in murine model** [11919-73]
- 11919 23 **Development of multi-modal system for quantitative phase and fluorescence imaging of osteo cancer cells** [11919-74]
- 11919 24 **White light interference microscopy and cell counting with wide field of view** [11919-75]

POSTER SESSION III

- 11919 25 **Flow controlled air puff generator towards in-situ brain tumor detection based on MHz optical coherence elastography [11919-76]**
- 11919 26 **Development of a miniature chip-on-tip intraocular endoscope [11919-77]**
- 11919 27 **Synthesis, microstructure, and optical properties of Ag₃Sn nanoparticles for plasmonic sensing applications [11919-78]**
- 11919 28 **Benefit of extending near-infrared wavelength range of diffuse reflectance spectroscopy for colorectal cancer detection using machine learning [11919-79]**
- 11919 29 **Optimization of tissue classification for colorectal cancer detection using support vector machines and diffuse reflectance spectroscopy [11919-80]**
- 11919 2A **Multispectral endoscopic setup for real time pathology detection [11919-81]**
- 11919 2B **Commissioning of a 3D optical imaging system for surface-guided breast radiation therapy [11919-82]**
- 11919 2C **Diagnostics of periodontitis using the Raman spectroscopy method [11919-83]**
- 11919 2D **Estimation of spectral characteristics of dentin materials during their demineralization [11919-84]**
- 11919 2E **Noble metal nanoparticles modified by cyanines and stilbenes for enhanced signal optical tomography and hyperthermal therapy [11919-85]**
- 11919 2F **GPU-accelerated inverse adding-doubling method for analysis of skin hyperspectral images [11919-86]**
- 11919 2G **A real-time evaluation of microfluidic-assisted laser treatment of poly-microbial biofilms [11919-87]**
- 11919 2H **Field portable grin-lens based micro-endoscopic system with oblique-illumination for cancer screening [11919-88]**
- 11919 2I **Enhanced photodynamic action with chlorin e6 and indocyanine green incorporated mesoporous silica nanoparticles against prostate cancer cells [11919-89]**
- 11919 2J **Photothermal fiber optic probes for thermal therapy [11919-90]**
- 11919 2K **Optical transmission feedback for infrared laser sealing of blood vessels [11919-91]**
- 11919 2L **Numerical analysis on ex-vivo second harmonic generation images of collagen structure of unstained basal cell carcinoma sections [11919-92]**
