Volume 12489

Proceedings of SPIE 0277-786X, V. 12489

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

NDE 4.0, Predictive Maintenance, Communication, and Energy Systems: The Digital Transformation of NDE,
edited by Norbert G. Meyendorf, Christopher Niezrecki, Ripi Singh, Proc. of SPIE Vol. 12489,
1248901 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.2684119

Proc. of SPIE Vol. 12489 1248901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *NDE 4.0, Predictive Maintenance, Communication, and Energy Systems: The Digital Transformation of NDE*, edited by Norbert G. Meyendorf, Christopher Niezrecki, Ripi Singh, Proc. of SPIE 12489, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

JOINT SESSION WITH 12491 AND 12489

12489 05 **A framework for assessing the reliability of crack luminescence: an automated fatigue crack detection system** [12489-4]

DIGITAL TWIN

12489 06 **Digital twin technology development and demonstration for aircraft structural life-cycle management (Keynote Paper)** [12489-5]

12489 07 **Digital twin for predictive maintenance** [12489-6]

12489 08 **Efficient community electricity load forecasting with transformer and federated learning** [12489-7]

THE DIGITAL TRANSFORMATION

12489 09 **Deep-learning-based out-of-distribution data detection in visual inspection images** [12489-9]

ENERGY AND SENSORS

12489 0C **Improving the effectiveness of anomaly detection in bridges through a deep learning method based on the coherence of signals** [12489-13]

12489 0D **Overcoming strain gauges limitation in the estimation of train load passing on a bridge through deep learning** [12489-14]

12489 0F **Characterization of a PVDF sensor embedded in a metal structure using ultrasonic additive manufacturing** [12489-17]

POSTER SESSION

12489 0J **Adaptive fixed rank kriging-based thermographic data processing for material defect detection** [12489-21]

- 12489 OK **An approach based on convolutional autoencoder for detecting damage location in a mechanical system** [12489-22]
- 12489 OL **A comparison between regular and physics-informed neural networks based on a numerical multibody model: a test case for the synthesis of mechanisms** [12489-23]
- 12489 OM **A multimodal fusion-based autoencoder for nondestructive evaluation of aircraft structures** [12489-24]
- 12489 ON **Real-time splatter tracking in laser powder bed fusion additive manufacturing** [12489-25]

Conference Committee

Symposium Chairs

Anastasia Muliana, Texas A&M University (United States)
Wiesław M. Ostachowicz, The Szevalski Institute of Fluid-Flow Machinery (Poland)

Symposium Co-chairs

Haiying Huang, The University of Texas at Arlington (United States)
Hani E. Naguib, University of Toronto (Canada)

Conference Chair

Norbert G. Meyendorf, Fraunhofer IKTS (Germany) and University of Dayton (United States)

Conference Co-chairs

Christopher Niezrecki, University of Massachusetts Lowell (United States)
Ripi Singh, Inspiring Next (United States)

Conference Program Committee

Ali Abdul-Aziz, Kent State University (United States)
Steven R. Anton, Tennessee Technological University (United States)
Nicolas P. Avdelidis, Cranfield University (United Kingdom)
Nasrin Azari, Floodlight Software (United States)
Marija Bertovic, Federal Institute for Materials Research and Testing (Germany)
Leonard J. Bond, Iowa State University of Science and Technology (United States)
Frank Brueckner, Fraunhofer IWS (Germany)
Marcelo Dapino, The Ohio State University (United States)
Saman Farhangdoust, Massachusetts Institute of Technology Media Laboratory (United States)
Kerrie Gath, Consultant (United States)
Sven Gondrom-Linke, Volume Graphics GmbH (Germany)
Nathan Ida, The University of Akron (United States)
Robin James, General Motors Company (United States)
Daniel Kanzler, Applied Validation of NDT (Germany)
Amrita Kumar, Acellent Technologies, Inc. (United States)

Jung-Ryul Lee, Korea Advanced Institute of Science & Technology
(Korea, Republic of)
Zheng Liu, The University of British Columbia Okanagan (Canada)
Theodore E. Matikas, University of Ioannina (Greece)
Michele Meo, University of Bath (United Kingdom)
Alexander Michaelis, Fraunhofer IKTS (Germany)
Piotr Omenzetter, University of Aberdeen (United Kingdom)
Martin Oppermann, Technische Universität Dresden (Germany)
Gyuhae Park, Chonnam National University (Korea, Republic of)
Kara J. Peters, North Carolina State University (United States)
Florian Raddatz, DLR (Germany)
W. Lance Richards, Armstrong Flight Research Center (United States)
Sascha Schieke, Molex, LLC (United States)
Lennart Schulenburg, VisiConsult X-ray Systems & Solutions GmbH
(Germany)
Stefano Sfarra, Università of L'Aquila (Italy)
Chris Udell, Voliro Airborne Robotics (Switzerland)
Bernd Valeske, Fraunhofer IZFP (Germany)
Johannes Vrana, Vrana GmbH (Germany)
H. Felix Wu, U.S. Department of Energy (United States)
Christian Wunderlich, Fraunhofer IKTS (Germany)
Yuan Yao, National Tsing Hua University (Taiwan)
Dong-Jin Yoon, Korea Research Institute of Standards and Science
(Korea, Republic of)
